

A Beginner's Guide to Community Needs and Resources in South Carolina

South Carolina Appleseed Legal Justice Center

October 2007

FOREWORD

This guide was produced by the South Carolina Appleseed Legal Justice Center with the assistance of Laura Burns, M.S.W. The information listed in this guide is current as of October 2007. Because some programs and services may change, the information in this guide may not always be up-to-date. There may also be programs and services in some counties that are not in this guide, as this guide is not meant to be a complete listing of all services available in a given area.

If you need help with a legal problem, you may want to talk to a lawyer. If you have a low income, you may wish to seek help from South Carolina Legal Services by calling LATIS at 1-888-346-5592. If you do not have a low income, you may wish to contact the South Carolina Bar Lawyer Referral Service at 1-800-868-2284.

The South Carolina Appleseed Legal Justice Center is dedicated to advocacy for low-income people in South Carolina. We strive to effect systemic change by acting in and through the courts, the Legislature, administrative agencies, community and the media, as well as to help others do the same through education, training and co-counseling. To find out more about our organization, go to <http://www.scjustice.org> on the Internet.

Introduction

The purpose of this guide is to provide information that can be used by organizations in local communities throughout South Carolina about the community resources and organizations that are available not only statewide, but in also specific local jurisdictions. Because we recognize that limitations on resources may prevent one organization from providing outreach and resources to more than one or a few counties in the state, we have provided current data on the economic status of each county in South Carolina. The economic data provided is current as of June 2007.

Section One of this manual details some of the assistance programs that are generally available on a statewide basis. Some of these programs are funded through federal dollars. Section Two of the manual contains the specific county information. Under each county's listing, we have included some organizations that are already engaged in either providing education and assistance or other outreach work. Finally, Section Three contains a list of the Community Development Corporations by county. This guide is not intended to be a complete list of all resources or community organizations available in any given area.

Questions about the services provided by individual programs or groups that provide assistance should be directed to that program or group's contact person.

SECTION ONE:

SELECTED STATE AND FEDERAL ASSISTANCE PROGRAMS

ABC Child Care Voucher Program

What is the ABC Child Care Voucher Program?

The ABC (Advocates for Better Care) Child Care Voucher Program is a state childcare subsidy program. The South Carolina Department of Social Services (DSS) administers the ABC child care program. The program is available statewide to qualifying residents. Eligible parents receive assistance with the cost of child care. As a result, child care expenses become more affordable to low-income workers. Although the ABC Child Care Voucher program is funded through federal dollars coming from the Child Care and Development Fund (CCDF), states match the federal funds and are able to set their own income eligibility requirements.

The ABC program will pay for all or part of the child care fees for children up to 13 years old. The amount covered by ABC program is dependent upon the age of the child, amount of child care needed, and the person or center chosen to provide care. Once a family is enrolled in the ABC program, the family is given a list of child care providers in their county. The family has the option to choose a caregiver on the list, or one not on the list, as long as the provider is licensed. There are additional steps an ABC recipient is expected to complete, including filling out paperwork and submitting to interviews. The recipient's childcare provider must submit to inspections, should the recipient decide not to use a DSS-approved provider.

Eligibility:

Persons eligible for the ABC Child Care Voucher program are parents who cannot afford child care and who are working, in school, in a training program, or receiving Family Independence (FI) services. If a person has just left the FI program due to job placement, he or she is still eligible to receive child care services for up to two years. Federal guidelines also specify that children under 13 and children with special needs up to age 18 are eligible for the program, and that payments to child

care providers must be “adequate” and family co-payments for child care must be “affordable”.

“Adequate” payments are defined by rates that are set no lower than the 75th percentile of market rate for the area. “Affordable” co-payments are defined as payments not exceeding 10% of family income.

The federal guidelines for the Child Care and Development Fund allow states to set eligibility up to 85% of the state median income. South Carolina gives families the opportunity to increase earnings while receiving ABC Child Care Voucher support up to a certain amount, without losing benefits. South Carolina income limits for new recipients are currently set at \$23,505 for a family of three, with existing recipient limits at \$27,243 for a family of three. The current average monthly co-payment for a family of three receiving ABC Child Care Voucher benefits is \$52, with an average annual co-payment of \$624.

Application Process:

Applications for the ABC Child Care Voucher program can be made through the local Department of Social Services (DSS) or by calling toll free 1-800-476-0199. Applicants who are turned down for the program have a right to ask for a Fair Hearing within 30 days of being turned down. A hearing may also be requested if services are terminated or other adverse action is taken. A request for Fair Hearing should be sent to SCDSS, Individual and Provider Rights, P.O. Box 1520, Columbia, SC 29205-1520.

Recipient requirements:

Once an applicant is approved for the program, DSS expects the recipient family to report changes in address, income, family size, and employment. Clients must reapply for ABC Child Care Voucher services at the end of the service period. Children are expected to attend child care on a

regular basis, and several unexcused absences may result in termination from the program. With written permission from DSS, a family may change providers.

Application Information:

South Carolina Department of Social Services
P.O. Box 1520
Columbia, SC 29202-1520
(803) 898-7601

A list of local DSS offices across the state can be found at <http://www.state.sc.us/dss/counties.html>.

Earned Income Tax Credit

What is the Earned Income Tax Credit?

The Earned Income Tax Credit (EITC) is a benefit designed to help working people who are earning low to moderate incomes by lessening their tax burden. Specifically, it is a refundable tax credit, which means that if a worker owes fewer taxes than the amount of the credit for which they qualify, they will receive the remaining credit as a refund (Greenstein, 2005). Accordingly, the EITC can be used to boost a taxpayer's income.

The EITC program is a federal program that began in 1975. The very first EITC was a credit of up to \$400 available only to eligible families with children. Because it is meant to be an incentive for the poor to work, the EITC has expanded over the years. In the 1990s, President Clinton and Congress doubled the size of the EITC, and then expanded the reach of the program to include low-income workers without children who earn under a certain amount per year. The maximum benefits vary depending on the number of qualifying children in the home. For the 2007 Tax Year, the maximum benefit available to be paid to workers with one child is \$2,853, to workers with two children is \$4,716, and to workers with no children is \$428.

Impact of the EITC:

Because the EITC is designed for the working poor, the program has a significant positive impact on the low-income community. Statistics confirm this. For example, the average income of an EITC eligible household is 125% of the poverty line. In 2006, an estimated eighty to eighty-five percent of those eligible for an EITC nationwide, made a claim for the credit. In 2005, over 4 million workers received the EITC, amounting to over \$970 million placed in the hands of low-to-moderate income households.

Data also shows the EITC contributed to reducing child poverty rates, by almost 25% in 2003 (Greenstein, 2005). There were 12.6 million children in poverty in 2003, before counting the EITC as part of the family income. After counting the EITC, it was found that 10.2 million children were in poverty, reducing the number by 2.4 million (Greenstein, 2005). In addition to decreasing poverty, the EITC can be used as a tool to help families invest, pay for large bills that are outside of their monthly budgets, or offset the cost of housing

Eligibility:

When determining if a person is eligible for EITC, three factors are considered; the taxpayer’s income, the number of children the taxpayer has, and the taxpayer’s marital status. Eligibility and credit amount vary based on these factors. The following chart lists the maximum income levels that a taxpayer can earn and still qualify for the EITC:

Maximum Annual Income Levels for EITC Program Eligibility – Tax Year 2007

	Single	Married (filing jointly)
Two or more qualifying children	\$37,783	\$39,783
One qualifying child	\$33,241	\$35,241
No qualifying child	\$12,590	\$14,590

The IRS has specific guidelines for defining a “qualifying child”. Under IRS rules, a qualifying child is one under 19 years of age if not a student, or 24 years of age if the qualifying child is a student. In addition, the qualifying child or children must have lived with the applicant for at least half of the year. Qualifying children can include sons, daughters, stepchildren, grandchildren and adopted children, brothers and sisters and their descendents, and foster children who are placed by authorized government or private agencies. Additionally, a qualifying child can only be claimed by one person or

family. Thus, if a divorced mother and father have joint custody of a child, only one parent can claim him for the purposes of EITC.

Other requirements for eligibility exist. For example, to use the EITC a taxpayer must have worked at least one day in the year, must be a U.S. citizen or a currently documented immigrant for the whole year, and must have a valid Social Security Number.

Application Process:

To claim the EITC, a taxpayer must file an IRS form 1040 or 1040A and a Schedule EIC when filing taxes. These forms are available online, or by phone. Workers without children do not have to complete a Schedule EIC, but can file a 1040, 1040A, or 1040EZ and fill out the EITC line on the form. It is also possible to get the EITC before the end of the year, by filing for an Advance EITC (AEITC). Recipients of the AEITC receive their funds in their paycheck instead of waiting until the end of the year. AEITC payments are not taxed as income. They come from the income tax, Social Security, and Medicare taxes that are taken out of the paycheck. A taxpayer should only use the AEITC if he or she does not expect to get a large pay increase during the year. To apply for this service, the taxpayer must complete a W-5 and give it to his or her employer. This form can be obtained online at <http://www.irs.gov/formspubs/> or by phone at 1-800-TAX-FORM (1-800-829-3676).

VITA Sites:

It is worth noting that free tax preparation assistance is available to individuals who earn under a certain annual income through Volunteer Income Tax Assistance (VITA) sites. By utilizing VITA sites, taxpayers can save on costly tax preparation fees. Additionally, taxpayers should think carefully before obtaining a refund anticipation loans (sometimes called “rapid refund loans”), which may often

involve costs that may equal or even exceed the value of the EITC credit received, thus nullifying the benefit of the credit.

Food Stamp Program

What is the Food Stamp Program?

The Food Stamp Program is a national entitlement program created in 1965 which enables low-income families to afford adequate food. Participants in the program use an Electronic Benefit Card, much like debit card, to buy food at grocery stores and participating providers. Since the program is an entitlement, all eligible families may receive benefits, although in actuality many do not.

Recent reforms from 2002 have increased state flexibility and allowed for legal immigrants to qualify for benefits if they are children, disabled, or elderly. The increase in flexibility also allows states to replace a flat deduction per household and instead use deductions calculated by family size, which allows for the possibility of greater benefits. For South Carolina in 2003, 108,000 households participated in the Food Stamp Program. These households included a total of 226,000 children. The participation rate for 2003 was estimated to be 65% of eligible persons.

Eligibility:

Eligibility for Food Stamps is linked to household size, income, and work requirements. A person may be eligible for food stamps if he or she buys and cooks food for their family, if he or she is homeless, or if he or she lives with another family. Persons who are working and earn under a set amount are also eligible, as are clients of the Family Independence program. The maximum income levels are as follows:

Maximum Income Levels - (Effective October 1, 2007 – September 30, 2008)

Household Size	Approximate Hourly Wage Limit (40-hour week)	Gross Monthly Income Limits	Net Monthly Income Limits	Gross Yearly Income Limits	Net Yearly Income Limits
1	\$6.39	\$1,107	\$851	\$13,284	\$10,212
2	\$8.56	\$1,484	\$1,141	\$17,808	\$13,692
3	\$10.74	\$1,861	\$1,431	\$22,332	\$17,172

Household Size	Approximate Hourly Wage Limit (40-hour week)	Gross Monthly Income Limits	Net Monthly Income Limits	Gross Yearly Income Limits	Net Yearly Income Limits
4	\$12.91	\$2,238	\$1,721	\$26,856	\$20,652
5	\$15.09	\$2,615	\$2,011	\$31,380	\$24,132
6	\$17.26	\$2,992	\$2,301	\$35,904	\$27,612
7	\$19.44	\$3,369	\$2,591	\$40,428	\$31,092
8	\$21.61	\$3,746	\$2,881	\$44,952	\$34,572
For each additional family member add:		+ \$377	+ \$290	+ \$4524	+ \$3,480

Note: Other deductions and resource limitations may apply.

The benefits are also uniform across states and set by federal guidelines.

Maximum Allotment Paid – (Effective October 1, 2007 – September 30, 2008)

Household Size	Maximum Allotment (Monthly)	Maximum Allotment (Annually)
1	\$162	\$1944
2	\$298	\$3576
3	\$426	\$5112
4	\$542	\$6504
5	\$643	\$7716
6	\$772	\$9264
7	\$853	\$10236
8	\$975	\$11700
For each additional member	+ \$122	

Source: USDA Food and Nutrition Service Food Stamp Program website - http://www.fns.usda.gov/fsp/applicant_recipients/eligibility.htm

Application Process:

The application process is made through the Department of Social Services. If the applicant is elderly, blind or disabled, an application can be filled out at a Social Security Office. Applicants will be asked to complete an application form, which can be downloaded and completed online. Applicants will need to provide identification for all family members residing in home, proof of financial resources, proof of income, and proof of expenses. Birth certificates and proof of identity for the

applicant and the applicant's household members are required. In addition, applicants must provide the following:

- Social Security cards for all household members
- Paycheck stubs
- Utility bills, rent receipts or proof of house payments
- Medical bills if the applicant is elderly or disabled
- Proof of any child care expenses
- Any bank records, insurance policies and deeds to property
- Business records if the applicant owns a farm or business

If an applicant is faced with an emergency situation where food is needed right away, Food Stamps may be available within 7 business days. Otherwise, applications will be processed in 30 days of the date when the applicant first applied. If a Food Stamp applicant with children does not have a job, DSS may ask that the applicant look for a job. However, if the applicant has no job and is an "able-bodied" adult between the ages of 18-49, Food Stamps will be limited to 3 months over a 36-month time period.

If an applicant is turned down for services, or if a recipient's services are terminated, the applicant or recipient has the right to a Fair Hearing. The individual has 90 days to ask for Fair Hearing, and 30 days to appeal if an adverse decision is made at the Fair Hearing. Should DSS ask the recipient for a repayment for receiving too much in Food Stamps, the individual should consult a lawyer before signing any paperwork.

Application Information:

South Carolina Department of Social Services
P.O. Box 1520

Columbia, SC 29202-1520
(803) 898-7601

Partners for Health and Partners for Healthy Children

What are Partners for Health and Partners for Healthy Children?

Partners for Health is the Medicaid program in South Carolina that provides health care coverage for adults earning incomes below a certain level. Partners for Healthy Children is the state program in South Carolina funded under the federal State Children's Health Insurance Program (SCHIP), and provides children ages 1-18 at or below 150% of the poverty line, coverage. Pregnant women and children less than one year of age are eligible at 185% of the federal poverty level.

Medicaid was established under Title XIX of the Social Security Act in 1965 and is currently the largest health insurance provider in the country. Medicaid is funded at the state and federal level on a matching scale based on the needs of the states. The federal matching rate in South Carolina is 69.89%, meaning that for every \$29.11 dollars spent by South Carolina, the federal government will pay \$69.89 dollars.

The SCHIP program originated in 1997 during a time when over 10 million children were without health care coverage. The SCHIP program gave \$40 billion dollars over 10 years to the states to provide health care coverage for children. A complex federal funding system determines each year what the states are eligible to receive. Similar to the regular Medicaid program, there is a federal matching rate for the SCHIP program ranging from 65% to 84%. One difference between the funding for Medicaid and SCHIP is that the SCHIP funding is in the form of a block grant.

In South Carolina, 1,706,000 individuals were found to be eligible for Medicaid in 2005. Of that number, 877,210 received Medicaid benefits. In 2004, the Medicaid expansion SCHIP program reached 51,469 children, however it was estimated that 16% of children went without coverage. Continued outreach and expansion of current services are needed to give South Carolinians access to health care.

Eligibility:

The SCHIP program is different in every state, and the program rules allows for each state to choose one of three coverage options. Those options are to increase Medicaid limits so that more children are eligible, develop a separate health insurance plan with different rules from Medicaid, or a combination of the first two options. South Carolina opted to expand Medicaid limits so that eligibility for children is increased. For adults and children ages 1-18 the eligibility for Medicaid is 150% of the federal poverty level. For pregnant women and children ages 0-1, the eligibility for Medicaid or SCHIP is raised to 185% FPL

Several categories of people may be eligible for Partners for Health. Some examples are as follows:

- Individuals who receive Family Independence (FI), also called TANF, if they have a very-low income and have a child under 18 (in some cases, 19) in the home to get FI.
- Individuals who have a very-low income but do not get FI (50% of poverty or below). This is for low-income adults who live with a relative child and do not get FI.
- Individuals who are pregnant or have a child under age one. The individual's income must be at or below 185% of the federal poverty guideline (\$37,000.00 per year for a family of four in 2006).
- Children up to age 19 whose family income is at or below 150% of the federal poverty guideline (\$30,000.00 per year for a family of four in 2006). Children can get Medicaid under this program even if their parents do not get Medicaid.
- Individuals who get Supplemental Security Income (SSI). Individuals may also receive Medicaid if they received SSI at some point in the past, even if they do not receive SSI now.
- Individuals who receive Medicare, have a low income, and have few resources.
- Individuals who lose Medicaid because their child or spousal support increases can still get Medicaid for four months. These individuals should be able to receive Medicaid without completing a new application.
- Individuals who lose Medicaid because their income from work increases can still get Medicaid for up to two years. This is called Transitional Medicaid. With Transitional Medicaid, you cannot lose your Medicaid because of an increase in income due to work. You should be able to get it without having to fill out a new application. Remember that even if you lose Medicaid, your children should still get Medicaid through Partners for Healthy Children.

The maximum income limit for the Partners for Health and Partners for Healthy Children programs are as follows:

Partners for Health Program:

Maximum Income Limits for:

Low-Income Families - (Effective October 1, 2007)

Family Size	Approximate Hourly Wage Limit (40-hour week)	Gross Monthly Income	Net Monthly Income
1	\$4.53	\$786	\$425
2	\$6.08	\$1,054	\$570
3	\$7.63	\$1,322	\$715
4	\$9.18	\$1,591	\$860
5	\$10.72	\$1,859	\$1,005
6	\$12.27	\$2,127	\$1,150
7	\$13.82	\$2,395	\$1,295
8	\$15.37	\$2,664	\$1,440

Note: For family sizes over 8, add \$145.00 for each extra person to the net income limit for 8. To calculate the gross income limit, multiply the net income limit by 185%.

Optional Coverage for Pregnant Women and Infants - (Effective March 1, 2007)

Family Size	Approximate Hourly Wage Limit (40-hour week)	Gross Monthly Income	Gross Yearly Income
1	\$9.08	\$1,574	\$18,889
2	\$12.18	\$2,111	\$25,327
3	\$15.27	\$2,647	\$31,765
4	\$18.37	\$3,184	\$38,203
5	\$21.46	\$3,720	\$44,641
6	\$24.56	\$4,257	\$51,079
7	\$27.65	\$4,793	\$57,517
8	\$30.75	\$5,330	\$63,955

Note: For each additional family member, add \$6,438 to the annual income. Divide by 12 and round up to the next whole dollar for the monthly income.

Partners for Healthy Children Program:

Maximum Income Limits for:

**Coverage for Children Ages 1 to 18
(Effective March 2007)**

Family Size	Approximate Hourly Wage Limit (40-hour week)	Monthly Income	Annual Income
1	\$7.36	\$1,276	\$15,315
2	\$9.87	\$1,711	\$20,535
3	\$12.38	\$2,146	\$25,755
4	\$14.89	\$2,581	\$30,975
5	\$17.40	\$3,016	\$36,195
6	\$19.91	\$3,451	\$41,415
For each additional family member add:		+ \$435	+ \$5,220

Application Process:

Applicants may apply for Medicaid at the local Department of Health and Human Services (DHHS) office. For applicants already receiving Supplemental Security Income (SSI), applications for Medicaid should be made at the local Social Security office. The applicant should be prepared to provide documentation including proof of identity for himself or herself and all children under 19 years of age in the household, paycheck stubs from all jobs, proof of US citizenship, Social Security cards for himself or herself and all children in the household, bank records, insurance policies, deeds to property, and business papers for business and farm owners.

Recipient Benefits:

Some persons receiving Medicaid may have a co-payment, although the co-payment is often a small amount. Children and the elderly are covered completely. Medicaid also covers all prescriptions costs for children. It pays for up to four prescriptions per month for adults. Medicaid will pay for no more than a 34-day supply of medication per prescription or refill per month. For some medications,

adults may be able to get more than the four-prescription limit. Additionally, Medicaid will retroactively pay bills up to three months before the application date.

DHHS will review cases annually to see if client is eligible to receive services for the following year. A form will be sent to client and must be completed to continue services. It is important for clients to update their addresses with DHHS so that a lapse in services does not occur. Should Medicaid application be turned down, payment denied, or services terminated, client has the right to ask for a Fair Hearing within 30 days of receiving notice of action to turn down, deny, or terminate the applicant/recipient.

Family Independence (FI) Program

What is the Family Independence (FI) Program?

The Family Independence (FI) program is South Carolina's Temporary Assistance for Needy Families (TANF) program. TANF is a federally funded welfare program. Prior to the creation of the TANF program, the federal welfare program was Aid to Families with Dependent Children (AFDC). The South Carolina Department of Social Services administers the FI program.

In 1996, Congress passed the Personal Responsibility and Work Opportunity Reconciliation Act creating Temporary Assistance for Needy Families (TANF). TANF changed welfare from an entitlement program into a block grant, requiring work for welfare. With a federal block grant, states have more flexibility to determine eligibility and create programs that promote work. Changing welfare into a transitional program with a focus on moving recipients into the workforce required several new components to the TANF policies that were absent from the AFDC policies.

South Carolina administers TANF funding and programs under the Family Independence Act. The Family Independence (FI) Program transformed South Carolina's welfare program into a transitional program that places a strong emphasis on participants engaging in socially responsible behavior and becoming self sufficient through employment and employment-related activities. Cash assistance is also now tied to a work component.

Recipient requirements:

FI recipients are expected to be working, or participating in work activities such as subsidized or unsubsidized employment, on-the-job training, community service, or providing child care services for other welfare recipients participating in community services. Eligible FI applicants are assigned a case manager who helps them develop a job search plan. Clients can then receive assistance when they agree to participate in certain activities such as assessment, job search, Job Club, family management

skills and other training. In addition to cash benefits, welfare recipients may be eligible for child care through the ABC Child Care Voucher Program.

Eligibility:

Eligibility is based on financial guidelines and the number of dependent children in the household under age 18. Each state uses its own percentage of the federal poverty guidelines for eligibility purposes. The 2007 HHS Federal Poverty guidelines are as follows:

2007 HHS Poverty Guidelines

Persons in Family or Household	48 Contiguous States and D.C.	Alaska	Hawaii
1	\$10,210	\$12,770	\$11,750
2	13,690	17,120	15,750
3	17,170	21,470	19,750
4	20,650	25,820	23,750
5	24,130	30,170	27,750
6	27,610	34,520	31,750
7	31,090	38,870	35,750
8	34,570	43,220	39,750
For each additional person, add	3,480	4,350	4,000

Source: United States Department of Health and Human Services, <http://aspe.hhs.gov/poverty/07poverty.shtml>

In South Carolina, a family must make 50% or less than the federal poverty guidelines to be eligible for assistance. For example, a family of four in 2007 would have to make no more than \$10,325 a year to be eligible for FI.

Under AFDC, the family had to consist of a single parent. However, under FI/TANF, both parents can live together, and financial eligibility is calculated based on the combined income of both parents. Certain resources such as a home, a car per licensed driver and up to \$2,500 in cash are exempt in determining financial eligibility. Additionally, other assets like an Individual Development

Account (IDA), the income of a minor child, and other federal aid are excluded from the income calculation.

Application Process:

Applications for FI can be made through the applicant's local DSS office. Applicants will be asked to bring documentation of income, proof of relationship to children in the household, and any paperwork detailing resources. DSS must act upon applications within 30 days from the date of application. Eligible FI applicants will then be asked to sign an Individual Self Sufficiency Plan (ISSP) that documents the responsibilities of the case workers and client, in a contractual agreement. Applicants agree to conduct an initial job search. After client has looked for a job, if he/she has not found one the case worker will assess job readiness, or assess eligibility for Job Club enrollment. After 60 days if the client has not found a job, the caseworker will review the ISSP and determine what barriers exist and decide if other services are needed.

Most families are only eligible to receive FI for two years over a ten-year period, with a five-year lifetime limit for welfare participants. Additionally, the assistance amount will not increase should recipient have a child after 10 months on FI. DSS may give family vouchers to provide for the new child. Exceptions to the time limit are rare, but recipients may receive assistance longer if they are finishing a training program or can show that job search efforts have been exhausted.

Programs and Services under FI:

The work component of FI creates an opportunity for personal and financial resource development by those who receive benefits and services. The federal law widely defines work activities, including training and education, as well as giving states the opportunity to create job through subsidies. Upon application approval, the case is opened, and all job ready clients are then

required to participate in Job Club and job search activities. “Job ready” individuals are those who have been employed for 12 out of the past 24 months.

Job Club involves classroom training with discussions and activities on topics such as education, assertiveness training, methods of job search, resume writing, and interviewing. The last eight weeks of Job Club encompass job search activities. At the completion of Job Club, individuals who are unable to find jobs are reassessed to determine if additional training is needed (Koralek, 2000).

There are several other work related programs to assist with individuals’ professional training and development.

- ❖ **Welfare-to-Work:** This program targets “hard to serve” individuals, offering services that focus again on employment and self-sufficiency.
- ❖ **Job Skills Training:** The Job Training Partnership Act (JTPA)/Workforce Investment ACT (WIA) and technical schools provide training specific to the job skills needed.
- ❖ **On-the-Job Training:** Also through the JTPA/WIA providers, on-the-job training is available to participants in certain jobs.
- ❖ **Approved Training:** These training programs extended to post-secondary degrees when needed to meet specific vocational objectives.
- ❖ **Vocational Rehabilitative Services:** Through the Department of Vocational Rehabilitation, clients can pursue rehabilitative services before searching for employment.
- ❖ **Work Experience Program:** Clients are paid a training allowance for involvement in areas that are typically identified as volunteer work or community service.
- ❖ **Work Supplementation:** This is a benefit paid to employers of welfare recipients. As an incentive for hiring a person on welfare, the employer can receive monetary compensation per hour that the recipient works.

- ❖ Educational Activities: The educational activities available for welfare recipients to pursue are elementary and secondary education, literacy, GED and diploma programs, English proficiency, and post-secondary programs.

Additional Information:

DSS will cover transportation and child care costs should these be barriers to a client's ability to work or maintain a job. Families leaving FI because of a job that puts them over the income limit are eligible for transitional child care and Medicaid. A family may not be sanctioned under the FI program until DSS has attempted to work out the problems through conciliation. If the family is sanctioned after the conciliation period, the family has 60 days to ask for a Fair Hearing to contest the DSS claim. Sanctioned persons also have the right to review the case file, and bring a lawyer or another person to the hearing.

Unemployment Insurance Benefits	Weekly payment for individuals who become unemployed involuntarily through no fault of their own	Website: SC Employment Security Commission - http://www.sces.org/

SECTION TWO:
COUNTY-SPECIFIC DATA
(ALPHABETICAL)

Abbeville County

Demographic Information

Abbeville County, located in the Northwestern part of the state, is home to a population of approximately 26,167 people. Divided by gender, females make up 52.1% of the population at 13,623, and males account for the remaining 47.9% at 12,544. The median age is 36.9, and the senior citizen population accounts for a modest portion of the entire population at 14.7%, or 3,842 persons 65 years and older. Racial distribution is as follows: 68.3% White, 30.3% Black, 0.1% American Indian, 0.2% Asian, and 0.3% other race. The Hispanic population (of any race) is estimated at 0.8% of the total population.¹

Economy and the Workforce

The economic data documented by the US Census Bureau is broken down by employment, finances, and workforce information. Educational data for Abbeville illustrates that 70.1% of the population have at least a high school diploma, and 12.8% have a bachelor's degree or higher. 57.1% of the population 16 years and older are employed. The unemployment rate for Abbeville County is 3.1%. Worker classes are divided into four categories, private wage and salary, government, self-employed, and unpaid family workers. The largest percentage of workers is found in the private wage/salary class, making up 78.6% of the labor force. Government workers account for 14.8% of employed, self-employed workers are 6.4% of the labor force, and 0.2% of laborers work in unpaid family positions.

The median household income is \$32,635. 23.1% of the 10,133 households have income less than \$15,000 per year. Households with income between \$15,000 and \$74,999 account for 67.4%, and 9.5% of households have income of \$75,000 and higher. There are 10.1% of families below poverty.²

County-wide Usage of Services

Services such as EITC, ABC child care, Medicaid, Food Stamps, and TANF are available to the working classes, and unemployed searching for work. Percentage of low-income tax returns that receive the EITC for Abbeville County was 43.1%. This number represents the number of persons in a low-income (less than \$34,178) category that received the EITC in 2002.³ The average dollar amount received by Abbeville citizens from the EITC return was \$1,795.

In the fiscal year 2005-2006, the monthly average of households using Food Stamps was 1,572, with an individual use total of 3,339. Total benefits to the county of Abbeville were \$2,454,717.⁴ Medicaid recipient expenditures for the fiscal year 2002-2003 for Abbeville County totaled \$18,440,091, compared to the state total expenditures of \$3,751,790,135.⁵ The TANF/Family Independence caseload for 2005 totaled 122 persons.⁶

Allendale County

Demographic Information

Allendale County, located in the Southwestern part of the state, is home to a population of approximately 11,211 people. Divided by gender, females make up 47.9% of the population at 5,374, and males account for the remaining 52.1% at 5,837. The median age is 35.1, and the senior citizen population accounts for a modest portion of the entire population at 12.7%, or 1,421 persons 65 years and older. Racial distribution is as follows: 27.4% White, 71.0% Black, 0.1% American Indian, 0.1% Asian, 3.0% other or two races. The Hispanic population (of any race) is estimated at 1.6% of the total population.¹

Economy and the Workforce

The economic data documented by the US Census Bureau is broken down by employment, finances, and workforce information. Educational data for Allendale illustrates that 60.0% of the population have at least a high school diploma, and 9.3% have a bachelor's degree or higher. 39.8% of the population 16 years and older are employed. The unemployment rate for Allendale County is 4.5%. Worker classes are divided into four categories, private wage and salary, government, self-employed, and unpaid family workers. The largest percentage of workers is found in the private wage/salary class, making up 68.9% of the labor force. Government workers account for 24.1% of employed, self-employed workers are 6.0% of the labor force, and 0.9% of laborers work in unpaid family positions.

The median household income is \$20,898. 40.4% of the 3,930 households have income less than \$15,000 per year. Households with income between \$15,000 and \$74,999 account for 52.8%, and 6.7% of households have income of \$75,000 and higher. There are 28.4% of families below poverty.²

County-wide Usage of Services

Services such as EITC, ABC child care, Medicaid, Food Stamps, and TANF are available to the working classes, and unemployed searching for work. Percentage of low-income tax returns that

receive the EITC for Allendale County was 60.4%. This number represents the number of persons in a low-income (less than \$34,178) category that received the EITC in 2002.³ The average dollar amount received by Allendale citizens from the EITC return was \$2,092.

In the fiscal year 2005-2006, the monthly average of households using Food Stamps was 1,321, with an individual use total of 3,170. Total benefits to the county of Allendale were \$2,368,867.⁴ Medicaid recipient expenditures for the fiscal year 2002-2003 for Allendale County totaled \$14,582,078, compared to the state total expenditures of \$3,751,790,135.⁵ The TANF/Family Independence caseload for 2005 totaled 79 persons.⁶

Barnwell County

Demographic Information

Barnwell County, located in the Southwestern part of the state, is home to a population of approximately 23,478 people. Divided by gender, females make up 51.9% of the population at 12,185, and males account for the remaining 48.1% at 11,293. The median age is 35.5, and the senior citizen population accounts for a modest portion of the entire population at 12.6%, or 2,962 persons 65 years and older. Racial distribution is as follows: 55.2% White, 42.6% Black, 0.3% American Indian, 0.4% Asian, 1.5% other or two races. The Hispanic population (of any race) is estimated at 1.4% of the total population.¹

Economy and the Workforce

The economic data documented by the US Census Bureau is broken down by employment, finances, and workforce information. Educational data for Barnwell illustrates that 67.5% of the population have at least a high school diploma, and 11.6% have a bachelor's degree or higher. 53.4% of the population 16 years and older are employed. The unemployment rate for Barnwell County is 4.5%. Worker classes are divided into four categories, private wage and salary, government, self-employed, and unpaid family workers. The largest percentage of workers is found in the private wage/salary class, making up 70.5% of the labor force. Government workers account for 23.5% of employed, self-employed workers are 5.5% of the labor force, and 0.4% of laborers work in unpaid family positions.

The median household income is \$28,591. 28.9% of the 9,074 households have income less than \$15,000 per year. Households with income between \$15,000 and \$74,999 account for 59.5%, and 10.6% of households have income of \$75,000 and higher. There are 17.9% of families below poverty.²

County-wide Usage of Services

Services such as EITC, ABC child care, Medicaid, Food Stamps, and TANF are available to the working classes, and unemployed searching for work. Percentage of low-income tax returns that receive the EITC for Barnwell County was 48.9%. This number represents the number of persons in a low-income (less than \$34,178) category that received the EITC in 2002.³ The average dollar amount received by Barnwell citizens from the EITC return was \$1,940.

In the fiscal year 2005-2006, the monthly average of households using Food Stamps was 2,018, with an individual use total of 4,849. Total benefits to the county of Barnwell were \$3,577,165.⁴ Medicaid recipient expenditures for the fiscal year 2002-2003 for Barnwell County totaled \$27,253,178, compared to the state total expenditures of \$3,751,790,135.⁵ The TANF/Family Independence caseload for 2005 totaled 165 persons.⁶

York County

Demographic Information

York County, located in the northern part of the state, is home to a population of approximately 164,614 people. Divided by gender, females make up 51.6% of the population at 84,863, and males account for the remaining 48.4% at 79,751. The median age is 34.9, and the senior citizen population accounts for 10.4% of the entire population at 17,072 persons 65 years and older. Racial distribution is as follows: 77.2% White, 19.2% Black, 0.9% American Indian, 0.9% Asian, 1.8% other or two races. The Hispanic population (of any race) is estimated at 2.0% of the total population.¹

Economy and the Workforce

The economic data documented by the US Census Bureau is broken down by employment, finances, and workforce information. Educational data for York illustrates that 77.2% of the population have at least a high school diploma, and 20.9% have a bachelor's degree or higher. 64.8% of the population 16 years and older are employed. The unemployment rate for York County is 4.2%. Worker classes are divided into four categories, private wage and salary, government, self-employed, and unpaid family workers. The largest percentage of workers is found in the private wage/salary class, making up 83.6% of the labor force. Government workers account for 11.2% of employed, self-employed workers are 4.9% of the labor force, and 0.3% of laborers work in unpaid family positions.

The median household income is \$44,539. 13.6% of the 61,094 households have income less than \$15,000 per year. Households with income between \$15,000 and \$74,999 account for 65.9%, and 21.6% of households have income of \$75,000 and higher. There are 7.3% of families below poverty.²

County-wide Usage of Services

Services such as EITC, ABC child care, Medicaid, Food Stamps, and TANF are available to the working classes, and unemployed searching for work. Percentage of low-income tax returns that receive the EITC for York County was 33.3%. This number represents the number of persons in a low-

income (less than \$34,178) category that received the EITC in 2002.³ The average dollar amount received by York citizens from the EITC return was \$1,767.

In the fiscal year 2005-2006, the monthly average of households using Food Stamps was 7,747, with an individual use total of 18,863. Total benefits to the county of York were \$14,712,789.⁴ Medicaid recipient expenditures for the fiscal year 2002-2003 for York County totaled \$95,797,545, compared to the state total expenditures of \$3,751,790,135.⁵ The TANF/Family Independence caseload for 2005 totaled 540 persons.⁶
